INFILL THAT STANDS THE TEST OF TIME

Redefining Your Landscape

“ My kids are constantly in and out of the yard, so the anti-microbial infill is helpful in keeping germs at a minimum for all of us. ”

- Sarah B., Homeowner

Envirofill® makes artificial turf look and feel great. It's tough enough for any application, and it's completely safe. **Envirofill** is American-made using non-toxic components. No wonder it's the favorite of landscape experts for everything from playgrounds and putting greens to residential lawns and pet areas.

Benefits

- **A different kind of infill.** Envirofill is composed of naturally occurring sand found only in the Hickory Formation of central Texas. Its highly rounded quartz core resists compression so it doesn't compact over the life of the turf.
- **It's cleaner.** Microban® antimicrobial protection is infused into Envirofill during the manufacturing process to help prevent the growth of bacteria, mold, and mildew that can cause stains, odors, and product deterioration.
- **Sustainable.** Because of its superior durability, Envirofill's coating and color are warranted for 16 years. When your turf wears out and needs replacement, Envirofill has the potential to be reused in your new turf.
- **Easy installation.** With its texturized thatch layers, landscape turf can be very dense and difficult to infill. Because of Envirofill's rounded shape, uniform size, and smooth surface, it quickly settles down into the turf—saving you time, effort, and aggravation.

Envirofill's exclusive partnership with Microban® provides an added level of antimicrobial protection for the lifetime of your infill.
