

Artificial Grass Commercial Financing

Artificial Turf Supply is pleased to announce our new lease/financing programs. We understand the substantial initial cost of an artificial grass project and have partnered with North Star Leasing Company to offer easy and affordable lease/financing programs quickly, and at low rates. This program allows businesses to get their facility of tomorrow, opened today with little or no upfront costs. Utilizing this program enables businesses to enjoy all the benefits of artificial grass while leaving crucial company capital free for other purposes.

Some of the significant benefits include:

1. No penalty for early payoff.
2. Leasing does not tie up your working capital.
3. A lease is not indicated as a liability on a financial statement.
4. Leasing conserves your credit lines for other use; you do not need to borrow against bank lines when you use leasing as an option.
5. Leasing allows budgeted agencies to obtain equipment through their operating expenses when capital funds are no longer available.
6. As a tax benefit, leasing gives you a rapid depreciation write-off.
7. We can arrange longer payment terms than lending institutions.
8. With a Fair Market Value (FMV) lease, you may expense every penny of every payment.
9. Leasing minimizes inflation risk by paying tomorrow's cost with today's dollars.
10. Leasing helps improve ratios and keep your balance sheet clean.
